Article 6 Centre of Excellence (ACE)

Since the Article 6 (A6) carbon market of the UNFCCC Paris Agreement was fully signed and operational at COP29 in 2024, more and more governments, businesses and investors are demanding how to create these new international carbon credits (ITMOs). In addition, the European Union (EU) has allowed, in November 2025, these Article 6 carbon credits into the largest trading bloc in the world, creating a new globally compliant carbon market, which is estimated to be worth $50bn by 2030 (Bloomberg).

Because this market is nascent, there has been a lot of confusion about the Article 6 carbon market, its carbon credits, how to develop these assets, and how to access and build this market, nationally (countries) and internationally (commercial trades).

In light of this, ITMO Ltd and the *Coalition for Rainforest Nations* (CfRN) are launching the **Article 6 Centre of Excellence (ACE)** at COP30, in Belem, Brazil.

The Article 6 Centre of Excellence (ACE) is a commercial and One-Stop solution to help countries, business and investors:

- Understand this new Article 6 carbon credit asset class and its new globally compliant carbon market under the UNFCCC Paris Agreement
- Provide professional advice to plan, create and develop A6 carbon credits at country-level and project level in the most effective way (Article 6.2 and Article 6.4)
- Implement A6 systems and processes to issue and finance A6 carbon credits nationally and internationally

ACE will be launched and located in the "Article 6 Lounge" at the *Coalition for Rainforest Nations* (CfRN) Pavilion in the UNFCCC Blue Zone from November 10-21, 2025.

Businesses, investors and governments interested in leveraging this new multi-billion dollar carbon market can expect to:

- **Organise One-One bilateral meetings** with an Article 6 expert to understand your needs
- **Learn about Article 6** carbon credits and market with panel discussions and workshops
- **Access potential Article 6** market makers and developers (investors, developers and Ministers)

The main benefits of ACE:

- Understand this new multi-billion Dollar global compliant Carbon Market
- Have a first-mover advantage in developing A6 carbon markets and credits for your company, investors and clients
- Use our One-Stop solution for all your NDC/A6 implementation needs from methodology to carbon credits
- Innovate new carbon funds and financial instruments including climate mitigation and adaptation
- Fulfil your net-zero targets, and help your stakeholders do the same
- De-risk Article 6 plans, implementation and issuance.
- Support the success of the UN Paris Agreement targets, and countries' NDCs.
- Stay ahead of carbon market regulations and requirements
- Learn from leading experts and A6 best practice
- Educate yourself on Article 6 through workshops, online courses and webinars.

Some of the services that will be offered are Article 6 Carbon Credit and NDC Advisory & Research, A6 Country Readiness, A6 Carbon Market development, A6 Feasibility studies, A6 education courses and many more.

ACE is managed by ITMO Ltd and CfRN.

If you would like to organise a meeting/session with us and learn more about our services, please contact Michael Mathres michael@itmo.com.
